JOINT – Healthy Transitions Crisis Residential Presentation

- Travis Atkinson (TBD Solutions) presented on history of crisis residential. Recovery-oriented treatment approach in a home-like environment. Size between 6-16 and LOS from 3-30 days. Purpose to divert people from psychiatric hospital. Outcomes show higher client satisfaction, higher clinical effectiveness, and lower cost (60-70% vs. Inpatient).
- Crisis Residentials can struggle when there are inappropriate referrals, lack of reasonable risk tolerance, 'Not in my backyard' misconceptions, and low numbers of referrals.
- Admission process: entry points in the Emergency Department or at the CMH in a mental health crisis. CMH screen, assess, and determine appropriate level of care for person.
- Healthy Transitions located in Alma and will have 6 beds. TBD Solutions has worked with Health Transitions staff to ensure standards as well as the spirit of the model of treatment is followed.
- Will have nursing, psychiatry access in the Crisis Residential
- Marketing will be available soon for the intake process.
- Location in an area where they are close to the hospital and Gratiot Integrated Health Network.

Questions:	By Who	N/A	By When	N/A
<ul style="list-style-type: none"> • How will Healthy Transitions work with referral sources when there is pressure to place people? Justine Mizer reported they will not be able to help all callers with placement due to the confines of the crisis residential model. • Lab work is required for entry into Healthy Transitions. How can CMHs get labs done without going to the ED? A physician office can order the labs but most referrals will likely come from the ED. • How will Healthy Transitions deal with 24hr pharmacy options? • Healthy Transitions will consider referrals without labwork utilizing Mi-SMART
