Programs (CMHSPs) Implications

Effective: March 1, 2020

Programs Affected: Medicaid, Healthy Michigan Plan, Children's Special Health Care

Services, Maternity Outpatient Medical Services

Per Centers for Disease Control and Prevention (CDC) and State recommendations, social distancing is encouraged to slow the spread of COVID-19 and thus preserve the health system capacity for the duration of this pandemic. Minimizing face-to-face contact whenever possible is strongly encouraged. These temporary policy changes offer flexibility for providers to meet the needs of beneficiaries through alternative means while protecting the health and welfare of both parties.

The purpose of this guidance is to allow flexibility related to telemedicine audio/visual requirements to protect the health and welfare of beneficiaries and providers while maintaining access to vital services during the COVID-19 pandemic. This guidance will be in effect for 30 days following the termination of the Governor's Declaration of a State of Emergency Order (2020-04, COVID-19), or on the first of the following month, whichever is later.

General Telemedicine Policy Expansion

Current telemedicine policy requires both audio and visual service delivery, and when all possibilities to provide services using both audio and visual have been deemed not possible, due to the COVID-19 pandemic the Michigan Department of Health and Human Services (MDHHS) is expanding telemedicine policy.

During the period with dates of service referenced above, all codes on the telemedicine database (which encompass primary care, behavioral health, etc.) will be allowed for the service delivery method **telephonic (audio) only**. (See telemedicine database attached.)

All other requirements of telemedicine policy, including scope of practice requirements, as represented in Bulletin MSA 20-09 and the Medicaid Provider Manual must be followed unless otherwise indicated by the Center for Medicare & Medicaid Services (CMS).

When reporting these services via telephone the appropriate Current Procedural Terminology/ Healthcare Common Procedure Coding System (CPT/HCPCS) code (as represented on the current telemedicine database), Place of Service 02—Telehealth and the GT—interactive modifier must be used. Also, "services provided via telephone" must be included in the remarks section. For Federally Qualified Health Centers (FQHC)/and Rural Health Centers (RHCs) please use the GT modifier and the remarks section as indicated in this addendum.

Please be advised that this is a temporary change to the current policy and will discontinue 30 days from the discontinuation of the state emergency or the first of the following month, whichever is later.

<u>Prepaid Inpatient Health Plans (PIHPs)/Community Mental Health Service Providers (CMHSPs) only</u>

During the period with dates of service starting March 1, 2020, and extending until 30 days after the state emergency has ended (or the first of the next month, whichever is later), all identified codes on the Behavioral Health and Developmental Disabilities Administration (BHDDA) COVID-19 Encounter Code Chart issued on March 18, 2020, will be allowed for the service delivery method **telephonic (audio) only**.

Please continue to report these codes as current policy states but include the statement "services provided via telephone" in the comments section.

All other requirements of telemedicine policy, including scope of practice requirements, as represented in Bulletin MSA 20-09 and the Medicaid Provider Manual must be followed.
