JOINT – Network Adequacy- Amanda Ittner		Requests for different MSHN committees to complete network adequacy items. New template brought confusion in the last year. Feedback was provided to the state and they worked to revise the template. Additional information will be needed for the narrative parts of the templates. CMHSPs are required to submit the data being requested as this is a PIHP mandate. Time and distance requirement will be calculated by the State instead of MSHN contracting with TBD Solutions. Expanded the location definitions for this reporting. Kyle Jaskulka (MSHN) is working with the Provider Network committee to gather some information.

JOINT – Upcoming Psychiatric Bed Registry		In 2018, Michigan Legislature passed Public Act 658(8) which requires the State of Michigan to implement a statewide psychiatric bed registry categorized by patient gender, acuity, age, and diagnosis, along with the creation of an advisory committee. The Michigan Department of Health and Human Services (MDHHS) has chosen EMResource to house Michigan's psychiatric bed registry. Many emergency departments and inpatient psychiatric facilities were familiar with and using EMResource, as it was already being utilized by the MDHHS Bureau of Emergency Preparedness, EMS, and Systems of Care in another capacity related to public health emergencies.			
		After several months of developing, reviewing, and finalizing data elements for the registry, the Psychiatric Bed Registry team is pleased to announce that the EMResource registry is now available for psychiatric hospitals to enter their data. The data elements are aligned with the federal requirements set forth by the Department of Health and Human Services (HHS) and the Centers for Medicare and Medicaid Services (CMS), which mandate daily data reporting on bed census and capacity. Copy of the email in today's folder. Dashboard readiness is estimated for spring 2025. Concerns about how up to date these records can be throughout any given day. Michigan Psychiatric Hospitals are expected to update their availability when there is a change from no beds to beds available and vice versa, as searchers will only see Yes/No for bed availability. Unsure how this will be monitored and how places will be held accountable for these updates.	By Who	Todd and Skye to follow up with Provider Network Committee	By When Prior to next meeting?

All Case Managers must be trained in HCBS services before they can authorize those services in the PCP. Annual requirement and at-hire. MSHN does not yet have the full trainings for these and have had to cancel some of these scheduled trainings. Will CMHSPs get the materials for the training to complete their own trainings? Or will they get the recorded trainings for use with staff? CMHSPs will not be able to create their own trainings so PIHP will do the trainings for the first year. Likely a train the trainer model.
