	1	Hillsdale Outreach	<p>Over the last month, the Harm Reduction program continued to conduct outreach in Hillsdale County. The Hillsdale outreach team continued to build partnerships with local organizations by distributing naloxone to businesses in the area. In addition, individuals encountered were provided with naloxone, drug test strips, condoms, hygiene supplies, feminine hygiene products, and some safe use supplies. They are continuing to work on obtaining naloxone distro boxes to place in Hillsdale. Additionally, their fourth testing event was moved to another location as the other location was closed for a staff meeting. The testing event took place on August 21st. One individual was tested for HCV and HIV. They plan to continue this testing event throughout the year. Beginning in August, they began operating a fixed-mobile site on Thursdays. They will offer harm reduction supplies and education to participants on the 1st, 2nd, and 4th Thursdays, as they are at another location on the 3rd Thursday of the month. A flyer was designed to advertise the fixed sites on Thursdays and distributed to local businesses and participants. Additionally, throughout August, the Hillsdale Harm Reduction Team conducted mobile outreach in Hillsdale and Jonesville every Tuesday. On August 3rd, the Harm Reduction Team brought our MCU to the 1st Recovery Walk in Hillsdale. During the event, they tested 6 individuals for HIV and HCV. One individual was referred to the Hillsdale Health Department for confirmatory HCV testing due to a reactive rapid antibody HCV test. The Harm Reduction program manager attended the August Hillsdale OFR meeting.</p> <p>Safer snorting, safer smoking, safer crystal, and safer rectal administration kits were assembled. Each kit contains one of the corresponding educational cards. The kits with the educational cards are distributed as requested or needed to participants. During August, 350 of these kits, containing the four types of educational cards, were distributed. The overdose prevention card with information on the Harm Reduction services and overdose prevention was distributed at events in Jackson and Hillsdale Counties, as well as distributed to businesses along with naloxone. Starting on 5/29/2025, each participant was provided with an updated participant ID card. Each new intake will receive one of these cards upon completing a confidential intake into the Harm Reduction program. In August, 20 of these were distributed to participants.</p>

	1	Harm Reduction	August has been their strongest month to date. They have seen a significant increase in the number of participants across all counties, with consistent growth in both mobile outreach and office-based services. Establishing a dedicated office space has proven pivotal, as it is gaining community trust and momentum—participants are increasingly comfortable accessing support there. Their mobile team has also improved operations by identifying better distribution sites, which has enhanced visibility and accessibility in key areas. In addition, they have launched a mailing option for harm reduction supplies, expanding their reach to individuals who cannot be reached in person or who prefer not to engage face-to-face. This innovation has allowed them to connect with community members who previously faced barriers to accessing services. Overall, August reflects a turning point in the program's visibility, consistency, and effectiveness.
