- CEI has received out of state hospitals in their Invalid NPI lists. MSHN is unsure whether these hospitals need to be acknowledged.
- There are numerous duplicates in CMH’s dangling admissions files, including people with mismatched service dates and people that have been closed for a while. Some of this is due to MSHN’s attribution methods based on available identifiers, which default to the newest.
- Encounters are going through as normal
- The compliance HSAG review was due last Friday and submitted directly. Our role in the review is uncertain, as we haven’t had to do the ISCAT as of late.
- There is a new rule that services administered by Nurse Practitioners require the NPIs of their supervising physicians. This does not apply to SUD services. It is unknown whether it applies to CMHs.
- There is some debate as to the best way to share authorization data as required by CFAP. MSHN must have on its website, the number of accepted, rejected, and changed authorizations and appeals, which is something that CEI states does not exist in their world. CEI would like to avoid building an authorization warehouse which may or may not be used, and would like to see what the other PIHPs are doing to follow the CFAP requirements before investing work into one.
- There is no movement to report on HB 4037
- The RFP process for the analytics workgroup has been paused in the meantime. Prior deadlines will be left open.
- Compliance software processes are presently expanding and adding compliance forms.

✓ KEY DECISIONS

	<ul style="list-style-type: none"> Michelle is asking for people to confirm that MSHN has the correct setup for each CMH as a Payer or a Payer/Provider CIO Forum: Brandon Rhue is still collecting information to see if everyone is in agreement over the reasons behind disenrollments. This information will be sent to the CEO Group <p>CCBHC: There is concerning language in the new handbook over moving the PPS One payment into the capitation, as well as the phrasing “may.” A lot of qualifiers have been added to Mild and Moderate populations and payments, seemingly concerning complaints about the LOCUS scores being a litmus for it.</p> <p>BHH No Commentary at this meeting.</p>
<p>✓ ACTION/INPUT REQUIRED</p>	<ul style="list-style-type: none"> CMHs will send closed dangling admissions back to MSHN. Steve will bring up Dangling Admissions problems at the next TEDS workgroup with Holli Steve will check with Amy Dillon for HSAG Compliance scheduling CEI will upload their Artificial Intelligence policies and procedures to the shared folder containing MSHN’s Steve will check with Crystal or Michelle at the department to verify whether the rule that services administered by Nurse Practitioners require the NPIs of their supervising physicians applies to the CMHs Steve will see what other PIHPs are doing in order to obtain authorization data in accordance with CFAP requirements CCBHC: CEI will send back commentary regarding the latest iteration of the handbook.
