✓ **KEY DECISIONS**

- MDHHS communications are available in either Email or FTP
- MSHN is uncertain what PCE is screening out of each CMH's ADTs. CMHs are encouraged to check with their project managers to arrange their ADT process accordingly. There is a new subcategory: Receiving and Sending Patient Centered Data Home, but these are primarily either Out of State activities or pertaining to people from out of state.
- The correct FY26 Encounter Recon file was received 9/10. Please note that SUD and MH are separate and arrive in two files, not one.

- MSHN responded with no comment to the HSAG PMV Review draft, as comments were for corrections, and we had none.
- The guidance received regarding the CLD/TEDS file specifications and edits on 9/11 should be the final version. Nonetheless please do not be surprised if updates are announced.
- Our dangling admissions numbers are still going up.
- Thank you for adding the Telehealth field for the Provider Directory now we just need to fill in the data
- Please request needed information for the EasterSeals MichiCANS biopsychosocial assessment in PCE and the MSHN Authorization Tracking Dashboard.
- Steve reassessed the MiHIN contract information and discovered that CMHs have been getting charged for Single Sign on activities. MiHIN did not consider this to be covered by our contract. Steve has amended this for FY27 and CMHs should no longer be getting charged as of 10/1.
- There is disagreement regarding what constitutes relevant prior authorization data for the MSHN Authorization Tracking Dashboard on the website. The MDHHS definition for prior authorization includes practically all services. Not everyone agrees.
- The HSAG PMV/NAV ISCAT should be received by next month.
- There have been no recorded issues regarding the MDHHS change from FTA to MOVEit.
- The Duplicate Rejections list is in the FTP folder for you to review and understand what MDHHS will reject when the edit is changed, scheduled for January 1, 2027.
- There is an HCBS Benefit Grid that needs to be submitted to MDHHS which requires some MichiCANS data. MSHN doesn't have access to CMH MichiCANS data outside of requesting it directly.
- There is one provider, GuardianTrac, which multiple CMHs are experiencing low levels of compliance regarding EVV. It is anticipated that future payments will be tied to EVV compliance in order to ensure compliance. Steve stressed the

	importance of monitoring Provider behavior and attempting some level of correction. • Clinical Leadership Committee is requesting a monthly status update on Autism information. SHW indicates that theirs has been completed for two months. MCN has available information and is only waiting on format. • The last MDHHS Waiver Audit came with the change that digital IPOS training sheets in PCE would no longer be accepted. This is widely considered to be an impractical and ineffective decision. Steve indicates that MSHN is willing to support pushback on MDHHS's decision, citing policy stating that electronic signatures are permissible. Behavioral Health Home Subgroup: No Items brought forward.
✓ ACTION/INPUT REQUIRED	• Steve will share recording links from the CLD/SUD TEDS training as requested. • Shyam will share dangling BH TEDS details to each CMH. • Steve will send an email for a complete update on Autism Module plans.
✓ KEY DATA POINTS/DATES	• Next Meeting is October 15th, all-virtual
